Specialty Imaging: Thoracic Neoplasms Melissa L. Rosado-de-Christenson, Brett W. Carter

Part of the highly regarded *Specialty Imaging* series, this unique title by Dr. Melissa L. Rosado-de-Christenson clearly presents the imaging features of all thoracic neoplasms (including those affecting the cardiovascular system) as well as staging of malignancies and patterns of metastatic spread **in a single, convenient volume**. An easy-to-read bulleted format and state-of-the-art imaging examples guide you step by step through every aspect of the field, including invasive diagnostic and therapeutic procedures. This book is **an ideal resource** for radiologists, pulmonary medicine physicians, thoracic surgeons, thoracic oncologists, and radiation oncologists - anyone who must distinguish lung cancer and thoracic metastases from less common malignant and benign neoplasms.

- **Superb illustrations highlight comprehensive coverage** of imaging manifestations of all benign and malignant thoracic neoplasms, including lesions in the lung, mediastinum, thymus, esophagus, cardiovascular system, pleura, and chest wall
- **Introductory chapters** discuss the various imaging modalities used in diagnosing and evaluating thoracic neoplasms, up-to-date imaging terminology, and the imaging signs that suggest neoplasia
- **Thorough coverage of lung cancer** offers authoritative guidance on screening, specific manifestations of various cell types, issues of staging, various tissue-sampling methods, missed lung cancer, lung cancer mimics, and imaging follow-up of treated lung cancer
- **High-quality images and succinct text** depict patterns of thoracic metastatic spread of several important malignancies, navigational bronchoscopy and image-guided biopsy, imaging manifestations of treated patients, and other key topics
- **A time-saving bulleted format** distills essential information for fast and easy comprehension
