CCSS Station Activities for Mathematics I Walch

Common Core State Standards Station Activities for Mathematics I is a collection of station-based activities to provide students with opportunities to practice and apply the mathematical skills and concepts they are learning in their Math I class.

Small group work has proven to be one of the best ways for students to make sense of mathematical problems. Students will learn to apply new math concepts, employ problem-solving strategies, communicate with one another, and reason through to the answers while working together.

This book contains several sets of activities for each of the following Common Core high school mathematics domains for Math I: Number and Quantity; Algebra; Functions; Geometry and Statistics and Probability. You may use these activities as a complement to your regular lessons, or in place of your regular lessons if students have the basic concepts but need practice.

18 sets of activities, each with 4 or 5 separate stations

10-15 minutes per station followed by a debrief discussion

Correlated to the Common Core State Standards for Mathematics, complementing any math program

Use readily available materials and manipulatives (not included)

The debriefing discussions after each set of activities provide a great opportunity for students to reflect on their experiences and synthesize their thinking. The debrief also provides an additional opportunity for ongoing, informal assessment.
