Kristin Shrader-Frechette

Environmental Justice: Creating Equity, Reclaiming Democracy (Environmental Ethics and Science Policy Series) Kristin Shrader-Frechette

Shrader-Frechette offers a rigorous philosophical discussion of environmental justice. Explaining fundamental ethical concepts such as equality, property rights, procedural justice, free informed consent, intergenerational equity, and just compensation--and then bringing them to bear on real-world social issues--she shows how many of these core concepts have been compromised for a large segment of the global population, among them Appalachians, African-Americans, workers in hazardous jobs, and indigenous people in developing nations. She argues that burdens like pollution and resource depletion need to be apportioned more equally, and that there are compelling ethical grounds for remedying our environmental problems. She also argues that those affected by environmental problems must be included in the process of remedying those problems; that all citizens have a duty to engage in activism on behalf of Environmental Justice; and that in a democracy it is the people, not the government, that are ultimately responsible for fair use of the environment.
