The Sacred Depths of Nature Ursula Goodenough

For many of us, the great scientific discoveries of the modern age--the Big Bang, evolution, quantum physics, relativity-- point to an existence that is bleak, devoid of meaning, pointless. But in *The Sacred Depths of Nature*, eminent biologist Ursula Goodenough shows us that the scientific world view need not be a source of despair. Indeed, it can be a wellspring of solace and hope.

This eloquent volume reconciles the modern scientific understanding of reality with our timeless spiritual yearnings for reverence and continuity. Looking at topics such as evolution, emotions, sexuality, and death, Goodenough writes with rich, uncluttered detail about the workings of nature in general and of living creatures in particular. Her luminous clarity makes it possible for even non-scientists to appreciate that the origins of life and the universe are no less meaningful because of our increasingly scientific understanding of them. At the end of each chapter, Goodenough's spiritual reflections respond to the complexity of nature with vibrant emotional intensity and a sense of reverent wonder.

A beautifully written celebration of molecular biology with meditations on the spiritual and religious meaning that can be found at the heart of science, this volume makes an important contribution to the ongoing dialog between science and religion. This book will engage anyone who was ever mesmerized--or terrified--by the mysteries of existence.

From reader reviews:

Ruth Ward:

Have you spare time for a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book eligible The Sacred Depths of Nature? Maybe it is to be best activity for you. You understand beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with it is opinion or you have various other opinion?

Eva Velasco:

Book is definitely written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. To be sure that book is important matter to bring us around the world. Adjacent to that you can your reading expertise was fluently. A reserve The Sacred Depths of Nature will make you to end up being smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that open or reading the book make you bored. It isn't make you fun. Why they are often thought like that? Have you searching for best book or acceptable book with you?

Robert Russo:

Playing with family in a park, coming to see the sea world or hanging out with friends is thing that usually you will have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love The Sacred Depths of Nature, you may enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout fellas. What? Still don't buy it, oh come on its identified as reading friends.

Jeffery Fulmer:

As a college student exactly feel bored for you to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this The Sacred Depths of Nature can make you sense more interested to read.
