Nematode-Trapping Fungi (Fungal Diversity Research Series)

Nematode-Trapping Fungi (Fungal Diversity Research Series)

These chapters provide up-to-date information on nematophagous fungi, particularly those of the *Orbiliaceae* in Ascomycota, whose asexual states produce nematode-trapping devices. The authors consider fungal-nematode interactions, fossil fungi, the biodiversity, ecology and geographical distribution of nematode-trapping fungi, and their potential use in biocontrol of nematodes, all in detail.

Nematode-trapping fungi with adhesive or mechanical hyphal traps are the main focus of this book which begins with an overview of the data on nematode-trapping fungi, including their taxonomy, phylogeny and evolution. Subsequent chapters expand upon the methods and techniques used to study these fascinating fungi. Keys for genera of *Arthrobotrys*, *Drechslerella* and *Dactylellina*, which include all reported species of predatory orbiliaceous fungi are presented and numerous species from these genera are morphologically described and illustrated.

The ecology of nematode-trapping fungi is expertly presented: their occurrence and habitats, their geographical and seasonal distribution and the effects of soil conditions and nematode density on their distribution all feature amongst the relevant themes.

Further chapters examine the use of nematode-trapping fungi in biological control and the authors consider nematicidal activities in detail, exploring the many compounds from fungi that feature in nematicidal activities and of course useful paths for further study on this topic.

This is a highly informative and carefully presented book, providing scientific insight for scholars with an interest in fungi and in biological control of nematodes.

From reader reviews:

Mario Berry:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a e-book. Beside you can solve your condition; you can add your knowledge by the guide entitled Nematode-Trapping Fungi (Fungal Diversity Research Series). Try to make book Nematode-Trapping Fungi (Fungal Diversity Research Series) as your pal. It means that it can being your friend when you sense alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every little thing by the book. So , let's make new experience in addition to knowledge with this book.

Maria Abel:

This Nematode-Trapping Fungi (Fungal Diversity Research Series) is great reserve for you because the content and that is full of information for you who also always deal with world and have to make decision every minute. This specific book reveal it information accurately using great coordinate word or we can state no rambling sentences within it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but difficult core information with beautiful delivering sentences. Having Nematode-Trapping Fungi (Fungal Diversity Research Series) in your hand like having the world in your arm, info in it is not ridiculous one. We can say that no publication that offer you world throughout ten or fifteen minute right but this reserve already do that. So , it is good reading book. Hey there Mr. and Mrs. busy do you still doubt this?

Gina Keller:

In this era which is the greater particular person or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple solution to have that. What you must do is just spending your time not much but quite enough to enjoy a look at some books. One of many books in the top record in your reading list will be Nematode-Trapping Fungi (Fungal Diversity Research Series). This book that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking upwards and review this book you can get many advantages.

Bert Martinez:

What is your hobby? Have you heard that question when you got scholars? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person just like reading or as reading through become their hobby. You have to know that reading is very important as well as book as to be the thing. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Numerous books that can you take to be your object. One of them is this Nematode-Trapping Fungi (Fungal Diversity Research Series).
