**The Neuropsychology of Psychopathology (Contemporary Neuropsychology)** Chad Noggle PhD ABN

This clinical reference book presents state-of-the-science knowledge about the neurobiology and genetics of the major mental disorders and how this corresponds with their psychiatric features and neuropsychological traits. The text demonstrates how the application of neuropsychology to these disorders provides a more comprehensive foundation for greater accuracy in assessment, diagnosis, and treatment. The book focuses on the neuropathological and pathophysiological basis of the various symptoms, emphasizing the biological basis of each disorder. This approach stresses the importance of looking at the other functional impacts of these manifestations (for example, cognitive deficits secondary to depression).

The text compares adult versus child presentation of psychiatric disorders and covers the major forms of psychopathology including ADHD; Learning Disabilities; Pervasive Developmental Disorders; Mood, Anxiety, Personality, and Schizophrenic Disorders; Cortical and Subcortical Dementias; and Delirium. The book is written for clinical professionals to increase diagnostic accuracy and intervention success and to provide a way to approach psychopathologies as disorders of the neurological system.

## **Key Features:**
