Did you know...The claim that "science and faith are enemies" is a myth? The discovery of DNA and its genetic code points squarely to a designer of the universe? The fossil record is a gigantic embarrassment and "headache" for evolution? Darwin's theories are based ultimately on philosophy, not on science? Brace yourself for a scientific earthquake! Strange "tremors" are now coming from science labs. As researchers uncover new levels of astonishing complexity within the cell, they suddenly face a shocking conclusion: Darwin was wrong. This sophisticated complexity could not arise by change; it must have been designed. Darwinism Under the Microscope probes the exciting "Darwinism vs. Design" debate that is making headlines. It lays a scientific foundation for "divine design" and equips the reader to discuss the topic intelligently...even with professors! One of the book's contributing authors, biologist Michael Behe, has done revolutionary work on the cell's tiny molecular machines. His "evidence of design" in Darwin's Black Box triggered an ever-expanding global controversy. Using Darwin's own pass-fail test, Behe concludes: "Darwin's theory has absolutely broken down." Darwinism Under the Microscope explains the "breakdown" and provides the knowledge and skill to share this breaking news with the next generation.
