This book compares the two computer algebra programs, Maple and Mathematica used by students, mathematicians, scientists, and engineers. Structured by presenting both systems in parallel, Mathematica's users can learn Maple quickly by finding the Maple equivalent to Mathematica functions, and vice versa. This student reference handbook consists of core material for incorporating Maple and Mathematica as a working tool into different undergraduate mathematical courses (algebra, geometry, calculus, complex functions, special functions, integral transforms, mathematical equations). Part I describes the foundations of Maple and Mathematica (with equivalent problems and solutions). Part II describes Mathematics with Maple and Mathematica by using equivalent problems.

May be it may be best activity to you.

Nancy Thornton:

As a university student exactly feel bored for you to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Maple and Mathematica can make you really feel more interested to read.
