## **Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology)** Martha A. Tucker, Nancy D. Anderson

This book is a reference for librarians, mathematicians, and statisticians involved in college and research level mathematics and statistics in the 21st century. We are in a time of transition in scholarly communications in mathematics, practices which have changed little for a hundred years are giving way to new modes of accessing information. Where journals, books, indexes and catalogs were once the physical representation of a good mathematics library, shelves have given way to computers, and users are often accessing information from remote places. Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics. Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics. These are grouped by type of material. Publication dates range from the 1800's onwards. Hundreds of electronic resources-some online, both dynamic and static, some in fixed media, are listed among the paper resources. Amazingly a majority of listed electronic resources are free.

### **From reader reviews:**

#### **Dennis Thorpe:**

Have you spare time for any day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book allowed Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology)? Maybe it is for being best activity for you. You recognize beside you can spend your time with the favorite's book, you can better than before. Do you agree with it is opinion or you have different opinion?

#### **Lewis Labelle:**

What do you regarding book? It is not important together with you? Or just adding material when you need something to explain what the ones you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They should answer that question because just their can do that. It said that about book. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need that Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) to read.

#### **Lester Gibbons:**

Hey guys, do you wants to finds a new book to study? May be the book with the headline Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) suitable to you? Often the book was written by renowned writer in this era. The actual book untitled Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) is a single of several books which everyone read now. This book was inspired a lot of people in the world. When you read this book you will enter the new dimensions that you ever know before. The author explained their strategy in the simple way, thus all of people can easily to understand the core of this reserve. This book will give you a lots of information about this world now. So you can see the represented of the world within this book.

#### **Jerry Jackman:**

The book untitled Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) is the guide that recommended to you you just read. You can see the quality of the publication content that will be shown to an individual. The language that creator use to explained their way of doing something is easily to understand. The article author was did a lot of research when write the book, hence the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) from the publisher to make you much more enjoy free time.
