Forecast Verification: A Practitioner's Guide in Atmospheric Science

Forecast Verification: A Practitioner's Guide in Atmospheric Science

Forecast Verification: A Practitioner's Guide in Atmospheric Science, 2nd Edition provides an indispensable guide to this area of active research by combining depth of information with a range of topics to appeal both to professional practitioners and researchers and postgraduates. The editors have succeeded in presenting chapters by a variety of the leading experts in the field while still retaining a cohesive and highly accessible style. The book balances explanations of concepts with clear and useful discussion of the main application areas.

Reviews of first edition:

"This book will provide a good reference, and I recommend it especially for developers and evaluators of statistical forecast systems." (*Bulletin of the American Meteorological Society*; April 2004)

"...a good mixture of theory and practical applications...well organized and clearly written..." (*Royal Statistical Society*, Vol.168, No.1, January 2005)

NEW to the second edition:

- Completely updated chapter on the **Verification of Spatial Forecasts** taking account of the wealth of new research in the area
- New separate chapters on **Probability Forecasts** and **Ensemble Forecasts**
- Includes new chapter on **Forecasts of Extreme Events and Warnings**
- Includes new chapter on **Seasonal and Climate Forecasts**
- Includes new **Appendix on Verification Software**

Cover image credit: The triangle of barplots shows a novel use of colour for visualizing probability forecasts of ternary categories – see Fig 6b of Jupp et al. 2011, *On the visualisation, verification and recalibration of ternary probabilistic forecasts*, Phil. Trans. Roy. Soc. (in press).

From reader reviews:

Christina Love:

Nowadays reading books be a little more than want or need but also work as a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book which improve your knowledge and information. The details you get based on what kind of e-book you read, if you want attract knowledge just go with training books but if you want truly feel happy read one having theme for entertaining for instance comic or novel. Typically the Forecast Verification: A Practitioner's Guide in Atmospheric Science is kind of book which is giving the reader unstable experience.

Chris Robertson:

Reading a book can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people love it. First reading a guide will give you a lot of new data. When you read a book you will get new information because book is one of numerous ways to share the information or even their idea. Second, examining a book will make you actually more imaginative. When you looking at a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you may share your knowledge to other folks. When you read this Forecast Verification: A Practitioner's Guide in Atmospheric Science, you may tells your family, friends and soon about yours guide. Your knowledge can inspire the mediocre, make them reading a publication.

Raymond Striegel:

People live in this new time of lifestyle always aim to and must have the free time or they will get lot of stress from both day to day life and work. So , if we ask do people have spare time, we will say absolutely without a doubt. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer may unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read is usually Forecast Verification: A Practitioner's Guide in Atmospheric Science.

Jerry Smith:

Playing with family in a park, coming to see the ocean world or hanging out with pals is thing that usually you have done when you have spare time, then why you don't try thing that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Forecast Verification: A Practitioner's Guide in Atmospheric Science, you may enjoy both. It is good combination right, you still need to miss it? What kind of hangout type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its named reading friends.
