Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology)

David Stern

This bibliographic guide offers users a basic overview of the current trends and the best, most important, and most up-to-date paper and electronic information resources in the field of physics. The author has selectively chosen and succinctly annotated a list of hundreds of major tools used by physical scientists and researchers, including bibliographic sources, abstracting and indexing databases, journals, books, online sources, and other subject-specific non-bibliographic tools. Stern also provides information on grants, personal bibliographic database tools, document delivery, copyright and reserves. In addition, he discusses future developments, directions, and trends in the field, and in the concluding chapter he outlines the history and developments of the physics. Designed to help students, new researchers in the field of physics, and working physicists in need of additional information resources outside their normal field of study, this is an invaluable reference, research, and collectio

From reader reviews:

Marilyn Chambers:

What do you concerning book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your spare time? Or are you busy man? If you don't have spare time to complete others business, it is make you feel bored faster. And you have time? What did you do? All people has many questions above. They must answer that question since just their can do that will. It said that about e-book. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this particular Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology) to read.

Edward Yung:

Do you have something that you like such as book? The guide lovers usually prefer to decide on book like comic, quick story and the biggest the first is novel. Now, why not seeking Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology) that give your satisfaction preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react to the world. It can't be explained constantly that reading habit only for the geeky individual but for all of you who wants to possibly be success person. So , for every you who want to start studying as your good habit, it is possible to pick Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology) become your starter.

Macie Austin:

Are you kind of busy person, only have 10 or 15 minute in your day to upgrading your mind skill or thinking skill actually analytical thinking? Then you have problem with the book as compared to can satisfy your small amount of time to read it because this time you only find publication that need more time to be study. Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology) can be your answer since it can be read by an individual who have those short extra time problems.

Maria Forshee:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's soul or real their hobby. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading really. Any students feel that studying is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Guide to Information Sources in the Physical Sciences (Reference Sources in Science and Technology) can make you sense more interested to read.
