Vicarious Language: Gender and Linguistic Modernity in Japan (Asia: Local Studies / Global Themes) Miyako Inoue

This highly original study provides an entirely new critical perspective on the central importance of ideas about language in the reproduction of gender, class, and race divisions in modern Japan. Focusing on a phenomenon commonly called "women's language," in modern Japanese society, Miyako Inoue considers the history and social effects of this language form. Drawing on ethnographic fieldwork in a contemporary Tokyo corporation to study the everyday linguistic experience of white-collar female office workers and on historical research from the late nineteenth century to 1930, she calls into question the claim that "women's language" is a Japanese cultural tradition of ancient origin and offers a critical genealogy showing the extent to which this language form is, in fact, a cultural construct linked with Japan's national and capitalist modernity. Her theoretically sophisticated, empirically grounded, interdisciplinary work brilliantly illuminates the relationship between culture and language, the nature of power and subject formation in modernity, and how the complex nexus of gender, language, and political economy are experienced in everyday life.
