Build "Wearable" Applications on the Android Wear and Google Fit Platforms

This book covers wearable computing and wearable application development particularly for Android Wear (smartwatches) and Google Fit (fitness sensors). It provides relevant history, background and core concepts of wearable computing and ubiquitous computing, as a foundation for designing/developing applications for the Android Wear and Google Fit platforms. This book is intended for Android wearable enthusiasts, technologists and software developers.

- Gain insight into "wearables" in the modern consumer ecosystem of a multitude of devices, ubiquitous computing, cloud computing and intelligent personal assistants
- Learn the Android Wear and Google Fit APIs and jump-start hands-on development including: setting up an Android development environment suitable for Android Wear and Google Fit , setting up smartwatch and fitness devices for development and debugging , writing applications that install and execute on Android Wear (smartwatch) devices , and applications that run on your handheld Android devices and find and connect to fitness sensors and access fitness data, and more
- Catch up with the new Android 5.0 "Lollipop", Android Studio and the gradle based build system

Learn how to write applications for smart watches and fitness sensors on the Android/Google ecosystem.

"Sanjay's tome provides a comprehensive and timely treatment of the essential points of current Wearable technology and Android Wearable development techniques. The easygoing and comprehensive examples make this book a joy to discover and a delight to peruse. Highly recommended!"

- Rudi Cilibrasi, Computer Scientist

 "The text provides a rich and immersive overview of the field of Wearable computing that is solidified by the impressive set of examples. I was simultaneously entertained as well as educated, and would highly recommend this book to anyone that is looking to get started with Wearables."

- Nathan Blair, Software Engineer & Entrepreneur

Sanjay M. Mishra began programming in C on various flavors of Unix in the early 1990s. Over the years he has developed diverse software systems spanning web applications and services, messaging, VoIP, NoSQL databases, as well as mobile and embedded platforms. He has worked for companies such as Intertrust, Eyecon Technologies, CallSource, nVoc (formerly Sandcherry, Inc.) and the Starz Entertainment group.

From reader reviews:

Christian Rice:

Book is written, printed, or created for everything. You can learn everything you want by a e-book. Book has a different type. As it is known to us that book is important issue to bring us around the world. Close to that you can your reading skill was fluently. A e-book Wearable Android: Android Wear and Google FIT App Development will make you to be smarter. You can feel much more confidence if you can know about every little thing. But some of you think that will open or reading the book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you seeking best book or ideal book with you?

Daniel Starnes:

Your reading sixth sense will not betray you, why because this Wearable Android: Android Wear and Google FIT App Development book written by well-known writer who knows well how to make book that could be understand by anyone who also read the book. Written inside good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still doubt Wearable Android: Android Wear and Google FIT App Development as good book not simply by the cover but also by the content. This is one reserve that can break don't determine book by its handle, so do you still needing a different sixth sense to pick this specific!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

Robert Alleman:

What is your hobby? Have you heard in which question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, All people has different hobby. Therefore you know that little person such as reading or as studying become their hobby. You must know that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You find good news or update about something by book. Different categories of books that can you go onto be your object. One of them is niagra Wearable Android: Android Wear and Google FIT App Development.

Lionel Huggins:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is prepared or printed or descriptive from each source that filled update of news. On this modern era like at this point, many ways to get information are available for you actually. From media social just like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Wearable Android: Android Wear and Google FIT App Development when you necessary it?
