Basics Project Management Architecture

Bert Bielefeld

Basics Project Management Architecture Bert Bielefeld

The core task of the classic architect, in addition to architectural design and planning work, is management of the construction project: from planning operations and tendering, to scheduling and cost planning and construction management. These important practical tasks are usually only covered during studies by one subject: Construction Management or Construction Economics, and thus treated as less significant. But every architect must master these abilities in order to manage and realize his or her own projects successfully.
