## **Heat Conduction and Mass Diffusion** Benjamin Gebhart

Containing not only classical material and analysis, but using this as a basis for many kinds of application processes which are important in critical technologies, this text provides a comprehensive treatment of heat and mass transfer at graduate level. Mass transfer mechanisms and processes are integrated with material on heat conduction and there are over 300 problems, graded from the very simple to the most complex mechanisms covered by the formulations. An abundance of classical analytical solutions show the value of such methodologies. Increasingly powerful numerical methods, as one of the most important aspects of modern heat and mass transfer education are also included.
