## **Nanocellulose Polymer Nanocomposites: Fundamentals and Applications (Polymer Science and Plastics Engineering) Vijay Kumar Thakur**

Biorenewable polymers based nanomaterials are rapidly emerging as one of the most fascinating materials for multifunctional applications. Among biorenewable polymers, cellulose based nanomaterials are of great importance due to their inherent advantages such as environmental friendliness, biodegradability, biocompatibility, easy processing and cost effectiveness, to name a few. They may be produced from biological systems such as plants or be chemically synthesised from biological materials.

This book summarizes the recent remarkable achievements witnessed in green technology of cellulose based nanomaterials in different fields ranging from biomedical to automotive. This book also discusses the extensive research developments for next generation nanocellulose-based polymer nanocomposites. The book contains seventeen chapters and each chapter addresses some specific issues related to nanocellulose and also demonstrates the real potentialities of these nanomaterials in different domains.

The key features of the book are:

- Synthesis and chemistry of nanocellulose from different biorenewable resources
- Different characterization of nanocellulosic materials and their respective polymer nanocomposites
- Physico-chemical, thermal and mechanical investigation of nanocellulose based polymer nanocomposites
- Provides elementary information and rich understanding of the present state-of- art of nanocellulose-based materials
- Explores the full range of applications of different nanocellulose-based materials.

### **From reader reviews:**

#### **Richard Hood:**

What do you consider book? It is just for students since they're still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that question above. Every person has different personality and hobby for each and every other. Don't to be obligated someone or something that they don't need do that. You must know how great in addition to important the book Nanocellulose Polymer Nanocomposites: Fundamentals and Applications (Polymer Science and Plastics Engineering). All type of book are you able to see on many solutions. You can look for the internet resources or other social media.

#### **Christina Evert:**

As people who live in typically the modest era should be up-date about what going on or facts even knowledge to make these keep up with the era which can be always change and move ahead. Some of you maybe may update themselves by studying books. It is a good choice in your case but the problems coming to anyone is you don't know what kind you should start with. This Nanocellulose Polymer Nanocomposites: Fundamentals and Applications (Polymer Science and Plastics Engineering) is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

#### **Curtis Salas:**

The actual book Nanocellulose Polymer Nanocomposites: Fundamentals and Applications (Polymer Science and Plastics Engineering) has a lot info on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research just before write this book. This book very easy to read you may get the point easily after scanning this book.

#### **Allison Sala:**

You can get this Nanocellulose Polymer Nanocomposites: Fundamentals and Applications (Polymer Science and Plastics Engineering) by look at the bookstore or Mall. Just viewing or reviewing it might to be your solve challenge if you get difficulties for your knowledge. Kinds of this reserve are various. Not only through written or printed but can you enjoy this book by e-book. In the modern era such as now, you just looking because of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose right ways for you.
