Avian Influenza (Monographs in Virology, Vol. 27)

Avian Influenza (Monographs in Virology, Vol. 27)

Because of its high impact on both animal and human health, avian influenza has become a matter of increasing public concern and growing scientific interest within the last decade. This volume gives an overview of the most important results of these research efforts and provides information about the ecology and epidemiology of avian influenza with particular emphasis on recent H5N1 outbreaks in China, Siberia and Europe. Several articles deal with new vaccination strategies, the use of antivirals and other control measures to combat outbreaks of avian influenza. Further chapters illustrate that molecular biology, culminating in the generation of influenza viruses by recombinant DNA technology, was instrumental in unravelling the roles of the viral hemagglutinin and polymerase as well as cellular signalling pathways and innate immunity in pathogenesis and interspecies transmission. Finally, the threat of a pandemic originating from avian influenza viruses is illustrated by the example of the Spanish influenza of 1918. This comprehensive publication on avian influenza viruses and their relevance for human influenza will be of great value to all influenza virologists, molecular biologists, public health scientists, veterinary virologists, ecologists, and scientists engaged in drug design and vaccine development.

From reader reviews:

Lidia Hill:

The book Avian Influenza (Monographs in Virology, Vol. 27) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a good thing like a book Avian Influenza (Monographs in Virology, Vol. 27)? A few of you have a different opinion about reserve. But one aim that will book can give many info for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or info that you take for that, it is possible to give for each other; it is possible to share all of these. Book Avian Influenza (Monographs in Virology, Vol. 27) has simple shape but you know: it has great and large function for you. You can seem the enormous world by open and read a reserve. So it is very wonderful.

John Malcolm:

Information is provisions for individuals to get better life, information presently can get by anyone on everywhere. The information can be a know-how or any news even restricted. What people must be consider when those information which is from the former life are difficult to be find than now's taking seriously which one is suitable to believe or which one the particular resource are convinced. If you get the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Avian Influenza (Monographs in Virology, Vol. 27) as the daily resource information.

Scott Burnett:

Your reading sixth sense will not betray you, why because this Avian Influenza (Monographs in Virology, Vol. 27) e-book written by well-known writer who knows well how to make book that may be understand by anyone who have read the book. Written throughout good manner for you, leaking every ideas and composing skill only for eliminate your own personal hunger then you still doubt Avian Influenza (Monographs in Virology, Vol. 27) as good book not merely by the cover but also with the content. This is one reserve that can break don't ascertain book by its cover, so do you still needing a different sixth sense to pick that!/? Oh come on your looking at sixth sense already alerted you so why you have to listening to an additional sixth sense.

Alexander Goodman:

In this period of time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended for you is Avian Influenza (Monographs in Virology, Vol. 27) this book consist a lot of the information with the condition of this world now. This book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. Often the writer made some

investigation when he makes this book. Here is why this book suitable all of you.
