VMware vRealize Orchestrator Cookbook Daniel Langenhan

Master the configuration, programming, and interaction of plugins with Orchestrator to efficiently automate your VMware infrastructure

About This Book

- Program with Orchestrator to automate and synchronize your infrastructure
- Integrate the base plug-ins into your workflows
- Packed with over 100 example workflows, packaged for download and reuse

Who This Book Is For

If you are a VMware administrator who is interested in automating your infrastructure, this book is for you. An understanding of basic programming concepts is advised. No previous knowledge of Orchestrator is required, although some previous knowledge of it will allow you to get started more easily.

What You Will Learn

- Install, configure, and optimize Orchestrator installations (Windows, Appliance as well as vRA integrated)
- Explore all the visual programming elements without the need for additional infrastructure
- Work with plugins such as SSH, mail, SQL, PowerShell, AD, SOAP, SNMP, AMQP, and REST
- Discover how to create VMware automation
- Get to grips with user management, synchronization, and packaging applications
- Understand policies and resources
- Work more efficiently with distributed Orchestrator environments

In Detail

Through this practical guide, you will gain an understanding of VMware vRealize Orchestrator and its role in the vSphere architecture and automation. You will learn about Orchestrator clusters as well as vRealize Automation integration. A full introduction to using the visual programming tools without needing any additional infrastructure is aimed at beginners with limited resources. This is followed by an extensive look at how to integrate the base plugins into your workflows, such as e-mail, AMQP, SNMP, and so on. We will also look at how to use the Orchestrator API to trigger workflows from other programs.

Through this book you will be able to get the most out of your Orchestrator installation, and develop complex workflows and create your own highly integrated automations of vCenter, vCloud, and vRealize environments.
