Essentials of Neuropsychological Assessment (Essentials of Psychological Assessment)

Nancy Hebben, William Milberg

Essentials of Neuropsychological Assessment (Essentials of Psychological Assessment) Nancy Hebben, William Milberg

Neuropsychological testing can identify changes in cognition, behavior, and emotion; aid in determining the cause of the change (e.g., neurologic disease, psychiatric disorders, or developmental problems); and assist clinicians in planning treatment and rehabilitation. To use these tests properly, professionals need an authoritative source of advice and guidance on how to administer, score, and interpret them. Written by two leading experts in neuropsychological assessment, *Essentials of Neuropsychological Assessment* is that source.

Like all the volumes in the *Essentials of Psychological Assessment* series, this book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to make optimal use of major psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered.

Essentials of Neuropsychological Assessment provides comprehensive instruction on test administration, scoring, and interpretation. The authors also address practical and conceptual issues related to neuropsychological assessment in geriatric, pediatric, forensic, and other specialized settings, as well as the essentials of report writing and common neuropsychological syndromes.
