He explains that music has a profound effect on history, morals, and culture and is a more potent force in the molding of character than religious creeds or moral philosophies. Whereas mediocre musicians reflect only their own times, inspired ones help determine the character of the future.

Scott explains how humans are composed not only of a physical body, emotional body, and a mental body but also a sensation body that acts as the bridge between the physical realm and the hierarchy of initiates. Scott shows how the music of great composers affects not only those listening but also society as a whole--from Beethoven's influence on the creation of psychoanalysis to Chopin's musical influence on the emancipation of women.
