Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) Andrew B. Lawson

Spatial epidemiology is the description and analysis of the geographical distribution of disease. It is more important now than ever, with modern threats such as bio-terrorism making such analysis even more complex. This second edition of *Statistical Methods in Spatial Epidemiology* is updated and expanded to offer a complete coverage of the analysis and application of spatial statistical methods. The book is divided into two main sections: Part I introduces basic definitions and terminology, along with map construction and some basic models. This is expanded upon in Part II by applying this knowledge to the fundamental problems within spatial epidemiology, such as *disease mapping*, *ecological analysis*, *disease clustering*, *bio-terrorism*, *space-time analysis*, *surveillance* and *infectious disease modelling*.

- Provides a comprehensive overview of the main statistical methods used in spatial epidemiology.
- Updated to include a new emphasis on bio-terrorism and disease surveillance.
- Emphasizes the importance of space-time modelling and outlines the practical application of the method.
- Discusses the wide range of software available for analyzing spatial data, including WinBUGS, SaTScan and R, and features an accompanying website hosting related software.
- Contains numerous data sets, each representing a different approach to the analysis, and provides an insight into various modelling techniques.

This text is primarily aimed at medical statisticians, researchers and practitioners from public health and epidemiology. It is also suitable for postgraduate students of statistics and epidemiology, as well professionals working in government agencies.

From reader reviews:

Amy Medina:

The ability that you get from Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) could be the more deep you searching the information that hide into the words the more you get serious about reading it. It does not mean that this book is hard to understand but Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) giving you enjoyment feeling of reading. The article writer conveys their point in particular way that can be understood through anyone who read this because the author of this book is well-known enough. This kind of book also makes your own personal vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this kind of Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) instantly.

Herbert Turley:

Reading a e-book tends to be new life style in this era globalization. With studying you can get a lot of information which will give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their very own reader with their story as well as their experience. Not only the storyplot that share in the ebooks. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their ability in writing, they also doing some analysis before they write to the book. One of them is this Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics).

Antonio Nelson:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their spare time with their family, or all their friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Can be reading a book is usually option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the publication untitled Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) can be great book to read. May be it is usually best activity to you.

Cynthia Campbell:

That e-book can make you to feel relax. This book Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) was bright colored and of course has pictures around. As we know that book Statistical Methods in Spatial Epidemiology (Wiley Series in Probability and Statistics) has many kinds or genre. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it can

make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading this.
