Agroenergia e stakeholders na Amazônia Legal Brasileira: Teoria e Prática (Portuguese Edition)

Robert Bailis, Marcus V. Alves Finco

A produção de biocombustíveis e, especialmente, a agroenergia como uma atividade econômica voltada para a promoção da chamada Economia Verde Inclusiva têm sido amplamente discutidas no Brasil, levando o País a desenvolver políticas e implantar o Programa Nacional de Produção e Uso do Biodiesel (PNPB) em 2004, visando ao desenvolvimento regional sustentável e, ao mesmo tempo, o fomento de uma fonte renovável de energia. Com este propósito, o livro aborda diferentes concepções metodológicas em diferentes regiões dentro da chamada Amazônia Legal Brasileira, a fim de auxiliar na análise e avaliação das ligações e inter-relações entre a produção e cultivo de sementes oleaginosas voltadas à produção de biocombustíveis e os impactos socioeconômicos e ambientais em comunidades na região. A soja, o pinhão manso, a mamona, o babaçu e o dendê são algumas das oleaginosas analisadas no decorrer do livro, e os resultados e discussão apontam as possíveis implicações do cultivo destas sobre o desenvolvimento regional sustentável, sobretudo no âmbito das estratégias de políticas públicas do setor agroenergético brasileiro.
