Computational Intelligence in Image Processing

Computational Intelligence in Image Processing

Computational intelligence based techniques have firmly established themselves as viable, alternate, mathematical tools for more than a decade. They have been extensively employed in many systems and application domains, among these signal processing, automatic control, industrial and consumer electronics, robotics, finance, manufacturing systems, electric power systems, and power electronics. Image processing is also an extremely potent area which has attracted the attention of many researchers who are interested in the development of new computational intelligence-based techniques and their suitable applications, in both research problems and in real-world problems.

Part I of the book discusses several image preprocessing algorithms; Part II broadly covers image compression algorithms; Part III demonstrates how computational intelligence-based techniques can be effectively utilized for image analysis purposes; and Part IV shows how pattern recognition, classification and clustering-based techniques can be developed for the purpose of image inferencing. The book offers a unified view of the modern computational intelligence techniques required to solve real-world problems and it is suitable as a reference for engineers, researchers and graduate students.

From reader reviews:

Wendy Brame:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Computational Intelligence in Image Processing. Try to face the book Computational Intelligence in Image Processing as your close friend. It means that it can for being your friend when you experience alone and beside associated with course make you smarter than before. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know anything by the book. So , let me make new experience and knowledge with this book.

Roderick Donnell:

Do you one among people who can't read pleasurable if the sentence chained inside the straightway, hold on guys that aren't like that. This Computational Intelligence in Image Processing book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to give to you. The writer regarding Computational Intelligence in Image Processing content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different such as it. So , do you nevertheless thinking Computational Intelligence in Image Processing is not loveable to be your top record reading book?

Margaret Jackson:

Information is provisions for folks to get better life, information nowadays can get by anyone from everywhere. The information can be a information or any news even an issue. What people must be consider if those information which is inside the former life are challenging be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Computational Intelligence in Image Processing as your daily resource information.

Grace Smith:

What is your hobby? Have you heard in which question when you got pupils? We believe that that question was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And also you know that little person including reading or as reading become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update in relation to something by book. Amount types of books that can you choose to adopt be your object. One of them is niagra Computational Intelligence in Image Processing.
