Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society

Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society

The book shows a very original organization addressing in a non traditional way, but with a systematic approach, to who has an interest in using mathematics in the social sciences.

The book is divided in four parts: (a) a historical part, written by Vittorio Capecchi which helps us understand the changes in the relationship between mathematics and sociology by analyzing the mathematical models of Paul F. Lazarsfeld, the model of simulation and artificial societies, models of artificial neural network and considering all the changes in scientific paradigms considered; (b) a part coordinated by Pier Luigi Contucci on mathematical models that consider the relationship between the mathematical models that come from physics and linguistics to arrive at the study of society and those which are born within sociology and economics; (c) a part coordinated by Massimo Buscema analyzing models of artificial neural networks; (d) a part coordinated by Bruno D'Amore which considers the relationship between mathematics and art.

The title of the book "Mathematics and Society" was chosen because the mathematical applications exposed in the book allow you to address two major issues: (a) the general theme of technological innovation and quality of life (among the essays are on display mathematical applications to the problems of combating pollution and crime, applications to mathematical problems of immigration, mathematical applications to the problems of medical diagnosis, etc.) (b) the general theme of technical innovation and creativity, for example the art and mathematics section which connects to the theme of creative cities.

The book is very original because it is not addressed only to those who are passionate about mathematical applications in social science but also to those who, in different societies, are: (a) involved in technological innovation to improve the quality of life; (b) involved in the wider distribution of technological innovation in different areas of creativity (as in the project "Creative Cities Network" of UNESCO).

From reader reviews:

Linda Davis:

As people who live in typically the modest era should be upgrade about what going on or details even knowledge to make these keep up with the era which is always change and move ahead. Some of you maybe will certainly update themselves by looking at books. It is a good choice to suit your needs but the problems coming to a person is you don't know what kind you should start with. This Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Stephan Stephens:

Reading a reserve can be one of a lot of task that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new facts. When you read a e-book you will get new information since book is one of numerous ways to share the information or perhaps their idea. Second, reading through a book will make an individual more imaginative. When you reading a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society, you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire others, make them reading a book.

Bridget Carter:

The publication untitled Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society is the guide that recommended to you to study. You can see the quality of the reserve content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, to ensure the information that they share for you is absolutely accurate. You also could get the e-book of Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society from the publisher to make you considerably more enjoy free time.

Mary Goldstein:

You could spend your free time to study this book this guide. This Applications of Mathematics in Models, Artificial Neural Networks and Arts: Mathematics and Society is simple to develop you can read it in the park, in the beach, train as well as soon. If you did not get much space to bring often the printed book, you can buy often the e-book. It is make you easier to read it. You can save the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.
