Clinical Trial Biostatistics and Biopharmaceutical Applications

Clinical Trial Biostatistics and Biopharmaceutical Applications

Since 1945, "The Annual Deming Conference on Applied Statistics" has been an important event in the statistics profession. In **Clinical Trial Biostatistics and Biopharmaceutical Applications**, prominent speakers from past Deming conferences present novel biostatistical methodologies in clinical trials as well as up-to-date biostatistical applications from the pharmaceutical industry.

Divided into five sections, the book begins with emerging issues in clinical trial design and analysis, including the roles of modeling and simulation, the pros and cons of randomization procedures, the design of Phase II dose-ranging trials, thorough QT/QTc clinical trials, and assay sensitivity and the constancy assumption in noninferiority trials. The second section examines adaptive designs in drug development, discusses the consequences of group-sequential and adaptive designs, and illustrates group sequential design in R. The third section focuses on oncology clinical trials, covering competing risks, escalation with overdose control (EWOC) dose finding, and interval-censored time-to-event data.

In the fourth section, the book describes multiple test problems with applications to adaptive designs, graphical approaches to multiple testing, the estimation of simultaneous confidence intervals for multiple comparisons, and weighted parametric multiple testing methods. The final section discusses the statistical analysis of biomarkers from omics technologies, biomarker strategies applicable to clinical development, and the statistical evaluation of surrogate endpoints.

This book clarifies important issues when designing and analyzing clinical trials, including several misunderstood and unresolved challenges. It will help readers choose the right method for their biostatistical application. Each chapter is self-contained with references.

From reader reviews:

Alejandra Dunlap:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each reserve has different aim or even goal; it means that reserve has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are reading whatever they get because their hobby is usually reading a book. Consider the person who don't like studying a book? Sometime, individual feel need book when they found difficult problem or exercise. Well, probably you will need this Clinical Trial Biostatistics and Biopharmaceutical Applications.

Kevin House:

Hey guys, do you would like to finds a new book to study? May be the book with the concept Clinical Trial Biostatistics and Biopharmaceutical Applications suitable to you? Typically the book was written by renowned writer in this era. The actual book untitled Clinical Trial Biostatistics and Biopharmaceutical Applications is a single of several books in which everyone read now. This particular book was inspired lots of people in the world. When you read this e-book you will enter the new shape that you ever know before. The author explained their plan in the simple way, and so all of people can easily to understand the core of this e-book. This book will give you a lot of information about this world now. To help you to see the represented of the world with this book.

Jenni Roberts:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are receiving problem with the book as compared to can satisfy your short space of time to read it because all of this time you only find e-book that need more time to be go through. Clinical Trial Biostatistics and Biopharmaceutical Applications can be your answer mainly because it can be read by you who have those short extra time problems.

Harrison Johnson:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is created or printed or illustrated from each source in which filled update of news. With this modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Clinical Trial Biostatistics and Biopharmaceutical Applications when you needed it?
